

Where and how should you isolate?

Stay home

Stay home except to receive medical care; do not come to campus, visit with others or take public transportation.

Remain in isolation until cleared by a public health staff member.

Monitor your symptoms

Monitor your symptoms and notify a healthcare provider of any changes or worsening of symptoms.

Avoid close contact with other members of your household and pets

Avoid contact with other members of your household. Stay in a separate room from other household members and use a separate bathroom, if possible.

Wash your hands

Regularly wash your hands for at least 20 seconds with soap and water or use hand sanitizer. Disinfect common surfaces daily.

Wear a face mask

If you must be around other people inside or outside of your household, wear a mask over your nose and mouth. Keep six feet of distance between yourself and others at all times.

The most important part about isolation is to follow the guidance provided by a public health official.
